

Preliminary Amdt.
Dated July 28, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1 1. (Currently Amended) A club organizer for a golf club carry bag,
2 comprising a cover means adapted to fit across the opening of the golf club carry
3 bag, the cover means having a [an arcuately shaped] ridge member adapted to be
4 supported along at least a portion of a rim defining the opening of the carry bag, the
5 ridge member having [a convex] an outer side wall and [a concave] an inner side
6 wall [defining a concavity], and web means located within the ridge member
7 [concavity] for rigidizing the ridge member [by urging the ridge member against the
8 rim], the ridge member having [being so inclined as to have an upper and lower end
9 and including] a plurality of [descending] apertures for passing the shaft of each of
10 the iron clubs therethrough and into the carry bag, each of the apertures including a
11 groove formed through the outer side wall for locating the head of respective ones of
12 the iron clubs so that[, in accordance with the indication of the ridge member, each
13 of the apertures is at a different height to each other of the apertures whereby] the
14 head of each of the iron clubs are [vertically] spaced apart from each other and are
15 directed outwardly, [away from the concavity,] and the web means defining a
16 plurality of apertures for locating the head of each of the wood clubs.

Preliminary Amdt.
Dated July 28, 2003

1 2. (Currently Amended) The club organizer of claim 1 wherein the
2 grooves are formed so as to suit both left and right handed clubs [The club
3 organizer for the golf club carry bag of claim 1 wherein the organizer includes a
4 collar means supported along the rim and upon which is supported the cover
5 means, the collar means including reinforcing members for supporting partitioning
6 means which are located between the shafts of at least some of the iron clubs, the
7 partitioning means extending downwardly from the collar means].

1 3. (New) The club organizer of claim 1 and including a collar means
2 supported along the rim and upon which is supported the cover means.

1 4. (New) The club organizer of claim 1 and including tubular partitioning
2 means extending downwardly from respective ones of the apertures for passing the
3 shaft of each of the iron clubs therethrough.

1 5. (New) The club organizer of claim 1 wherein the ridge member is
2 arcuately shaped.

1 6. (New) The club organizer of claim 5 wherein the arcuately shaped
2 ridge member has a convex outer side wall and a concave inner side wall defining
3 a concavity.

Preliminary Amdt.
Dated July 28, 2003

1 7. (New) The club organizer of claim 6 wherein the web means is located
2 at the concavity defined by the concave inner side wall defining a concavity.

1 8. (New) The club organizer of claim 5 wherein the arcuately shaped
2 ridge member is inclined so as to have an upper end and a lower end with each of
3 the apertures being at a different height to each other of the apertures, whereby the
4 head of each of the iron clubs are vertically spaced apart from each other.
